

陳建豪 Jimmy Chen

DEVOPS / SRE / AI ENGINEER

jimc1682000@gmail.com · github.com/jimc1682000 · linkedin.com/in/594jimmychen · New Taipei, Taiwan

13 years across IT infrastructure and software engineering, with 5+ years focused on DevOps / SRE. I combine backend development (Java / Python) with large-scale cloud platform operations, and improve reliability through IaC, observability, and automation — recently bringing AI / agentic workflows into operations.

CORE SKILLS

- **Cloud / Platform:** AWS (deep), GCP, Kubernetes, EKS, Docker, ECS
- **IaC / CI-CD:** Terraform, Ansible, GitLab CI, Jenkins
- **Observability:** Prometheus, Grafana, ELK / EFK, CloudWatch, DevOps Guru
- **Languages:** Java, Python, JavaScript, Bash
- **Databases:** MySQL, PostgreSQL, Aurora, DynamoDB, MongoDB, Redis
- **AI / Agentic:** AWS Bedrock, Claude Code, agentic workflows, RAG / knowledge-base automation

AI / AGENTIC ENGINEERING

- Self-host and operate an AI platform (OpenClaw on VPS); build Claude Code skills and agentic workflows applied to DevOps / SRE operations
- Built a knowledge-base automation pipeline (distill, publish, semantic search) integrated with Slack / Jira / Notion

EXPERIENCE

Staff DevOps Engineer · CATCHPLAY

2024.04 — Present

- Re-architected the data layer: introduced Aurora MySQL read replicas for load distribution, migrated MySQL to PostgreSQL, and adopted RDS Proxy to resolve high-concurrency connection bottlenecks
- Built an AWS Elemental media streaming pipeline (MediaLive / MediaPackage / MediaTailor) integrated with DRM content protection
- Upgraded Airflow to 2.0 across UAT and Production; built a DynamoDB monitoring dashboard and adopted AWS DevOps Guru to detect RDS anomalies
- Evaluated and rolled out AWS Bedrock AI tooling and Secrets Manager; used SQS to relieve Telkomsel high-volume order-processing bottlenecks
- Stood up an AWS Personalize environment and delivered recommendation features to BI / Backend teams; introduced DynamoDB for the CP4.0 platform
- Designed an S3 + NAS hybrid storage architecture and Akamai IaC CDN automation; redesigned the partner upload flow and lifecycle management

Senior SRE Engineer · TrendMicro

2021.09 — 2024.03

- Ran multiple disaster-recovery drills and maintenance windows, and owned cross-service incident response
- Optimized cloud cost by auditing and decommissioning idle / low-utilization resources, and tuned data transfer and logging
- Drove the Opsworks → ASG / SSM migration, built end-to-end (E2E) monitoring, and established a service readiness review process

Senior DevOps Engineer · GoFreight

2020.10 — 2021.09

- Replaced dev / stage environments with containers and ran unit tests in the CI/CD pipeline to improve reliability
- Built EKS for high availability and rolling upgrades; introduced ELK for centralized log management
- Cut cost with EC2 RIs / right-sized instances and DMS migrations; upgraded MySQL from 5.6 to 8.0; added autoscaling Jenkins workers for peak load

Senior DevOps Engineer · CATCHPLAY

2019.02 — 2020.10

- Built a stress-test environment to locate system bottlenecks; created a one-click CI/CD pipeline for multi-environment deployment
- Replaced cron jobs and ETL with Airflow; used EC2 Spot / RIs to cut cost; consolidated logs with Lambda
- Standardized components via containers and managed log parsing with ELK + Curator

Senior Java / DevOps Engineer · Groundhog Tech

2017.11 — 2019.02

- Deployed DSP / DMP systems with improved performance and security; introduced Kubernetes, Ansible, and GitLab CI/CD
- Maintained and extended the CovMo signal-optimization system; refactored code and tuned SQL queries

Senior Java Web Engineer · Bank SinoPac

2015.04 — 2017.11

- Gathered requirements from users and built an investment-workflow system and RESTful web services from the ground up

Senior System Engineer · Gping Construction

2014.03 — 2015.04

- Hardened firewall and network topology; built a backup server with Acronis

System Engineer · Global Publishing

2012.09 — 2014.03

- Upgraded Windows AD (2000 → 2008) and Exchange; built HA with VMware, ran P2V migrations for legacy systems, and set up a WSUS server

SELECTED PROJECTS

- [film-brain](#) — AI film-library brain — static portfolio: semantic search replay, debugging case study, eval iteration story
- [a-day-with-my-ai-wife](#) — 我與老婆的一天 — A day debugging Gitea OOM with my AI wife (Claude Code). 14 collaboration tips included.
- [Enlighten by Item \(UnionPay Mobile App Contest\)](#) — mobile app, top-5 finalist
- [Java Dojo — Refactoring Patterns](#) — talk on refactoring techniques
- [ZK 101](#) — introductory tutorial on the ZK framework

EDUCATION, CERTIFICATIONS & LANGUAGES

- **Education:** Soochow University, B.A. (2007 — 2012) · Tainan First Senior High School (2004 — 2007)
- **Certifications:** OCPJP7 · CEH · RHCE · MCITP · CCNA
- **Languages:** Chinese (native) · English (professional working proficiency · TOEIC 845)
